

JOSEPH SEGBEFIA

FULLSTACK DEVELOPER

SUMMARY

A highly motivated and versatile individual with a strong background in data science and marine engineering, complemented by proficiency in web development using the MERN Stack and Handlebars. Equipped with hands-on experience in building dynamic web applications, I am eager to leverage my technical skills and problem-solving abilities to pursue a rewarding career in web development. With a passion for innovation and a commitment to continuous learning, I am prepared to contribute effectively to a dynamic team in an entry-level developer role.

PROJECTS

Beer Explorer: Discovering the World of Beers with PunkAPI

- A Web Application that offers a comprehensive and descriptive list of various beers sourced from the PunkAPI npm package
- Implemented server-side rendering using handlebars.

Portfolio Website: A web application to showcase my projects

- Developed a dynamic web application to enable users to explore my projects, and send messages to me from the app.
- Used React, and tailwind CSS for the front-end.
- Implemented RESTful APIs to fetch data from the backend.
- ExpressJs and NodeJs for the backend.
- Utilized MongoDB for data storage.
- Used JWTs for authentication and authorization.
- Implemented user authentication and authorization features to ensure secure access to certain routes.

EXPERIENCE

Operations Assistant

Hive Technologies, Rangsdorf • May 2022 - Current
